AccessNano is a unique, cutting-edge nanotechnology resource designed to introduce accessible science and technology into classrooms from years 7 to 11.

Providing 13 ready-to-use web-based teaching modules featuring PowerPoint presentations, experiments, activities, animations and links to interactive websites, AccessNano will allow science teachers to incorporate nanotechnology into their lesson plans in accordance with existing curriculum requirements.

*“AccessNano has been developed by teachers for teachers and provides much needed support to link nanotechnology with the required science curriculum syllabi and frameworks. ASTA endorses AccessNano as it is a well-thought out resource that engages students.”*

Peter Russo, Chief Executive Officer, Australian Science Teachers Association (ASTA)

Teacher Professional Development is now available to support the recent launch of the innovative Australian nanotechnology education initiative AccessNano ([www.accessnano.org](http://www.accessnano.org)).

AccessNano Teacher Professional Development will be available in Adelaide, Canberra, Darwin, Hobart, Melbourne, Perth, Sydney and Townsville from April-July 2009.
